Ore Zone/ Year/Report On		Tonnage/ Category	Commodity	Grade	Reference/ Comments
SAMPLE	2017	N	Assay/analysis Grab	Copper	a sample (J488628) of massive epidote with malachite staining assayed greater than 1.00 per cent copper and 0.396 gram per tonne gold Assessment Report 37096
				Gold	
DRILLHOLE	2002	N	Assay/analysis Drill Core	Copper	diamond drilling yielded intercepts of 0.58, 0.47 and 0.79 per cent copper with 0.21, 0.21 and 0.14 gram per tonne gold over 0.76, 1.07 and 3.05 metres, respectively, in hole DM-1 Assessment Report 27039
				Gold	
SAMPLE	2000	N	Assay/analysis Grab	Gold	a sample (11868) of epidote altered basalt with clots of pyrite-chalcopyrite and malachite staining from a historic trench Assessment Report 26469).
				Silver	
DRILLHOLE	1981	N	Assay/analysis Drill Core	Copper	diamond drilling intercepted a series of massive pyrite lenses, up to 13 metres wide, in an andesitic volcanic breccia Assessment Report 9590
				Silver	
SAMPLE	1980		Assay/analysis Grab	Silver	Grab sample assay from the main trenched and drilled area. Assessment Report 8453.
				Gold	
SAMPLE	1980	N	Assay/analysis Grab	Copper	a grab sample from the main trenched and drilled area Assessment Report 8453
				Silver	
MAIN	1965	Y	25,400 t Indicated	Gold	By 1965, drilling is reported to have identified a magnetite-chalcopyrite-pyrite lens striking north-northwest, dipping 60 degrees west, with a 36 metre strike length, a 54 metre dip length and a probably true width of 5.4 metres yielding an estimated indicated tonnage and grade for the plunging elliptical ore shoot of 25,400 tonnes grading 1.48 per cent copper with approximately 25 per cent magnetite Property File – 801029
				Copper	
DRILLHOLE	1962		Assay/analysis Drill Core	Copper	Best result from early diamond drilling, over 6 metres. Assessment Report 449.
				Magnetite
