| 2018                        | N | Assay/analysis<br>Grab |           |           | Sample # 1438209: Grey, tan, light brown to orange with bluegreen (malachite) weathered, dark grey to tan heavily fractured rusty rhyolite (?). Rock may be on contact between diabase and rhyolite. Silicified with 1-5cm quartz veins cross cutting, variable orientation. Heavily mineralized with >10 per cent sulfides 5 per cent chalcopryrite in abundant quartz-carbonate-chalcopryrite-pyrite veins/veinlets and disseminations. Locally rock appears brecciated due to density of veinlets. Malachite and azurite throughout rock as disseminations and fracture coatings.<br>ARIS 37700 |
