

MINFILE Inventory Detail Report  
BC Geological Survey  
Ministry of Energy, Mines and Petroleum Resources

|                        |          |              |        |                |         |
|------------------------|----------|--------------|--------|----------------|---------|
| <b>MINFILE Number:</b> | 104P 107 | <b>Name:</b> | NOME 1 | <b>Status:</b> | Showing |
|------------------------|----------|--------------|--------|----------------|---------|

| Ore Zone/<br>Year/Report On |   | Tonnage/<br>Category   | Commodity | Grade    | Reference/<br>Comments  |
|-----------------------------|---|------------------------|-----------|----------|---|
| VEIN                        |   |                        | Gold      | 0.46 g/t | A sample (RH-14) from a series of parallel, 0.25 metre wide, quartz veins with ankerite alteration and disseminated pyrite<br>Assessment Report 17666   |
| 1988                        | N | Assay/analysis<br>Rock |           |          |   |
| TRENCH                      |   |                        | Gold      | 0.54 g/t | Three rock samples (collected within the trench) consisting of oxidized and vuggy quartz and carbonate altered volcanics contained between 0.32 and 0.54 gram per tonne gold<br>Assessment Report 16186   |
| 1987                        | N | Assay/analysis<br>Rock |           |          |   |
| SOUTHWEST                   |   |                        | Gold      | 0.70 g/t | A rock sample (21074R) from quartz-carbonate veins in a breccia zone cutting meta-volcanic rocks, located approximately 700 metres to the southwest of the occurrence, while other samples from a zone of meta-volcanic rock hosting trace chalcopyrite and pyrrhotite as fracture-fillings, located on the east side of ridge approximately 1.2 kilometres south-southwest of the occurrence, yielded values of up to 0.11 per cent zinc and 14 grams per tonne silver<br>Assessment Report 9344 |
| 1980                        | N | Assay/analysis<br>Rock |           |          |   |
