Ore Zone/ Year/Report On		Tonnage/ Category	Commodity	Grade	Reference/ Comments
VEIN			Zinc	47.37 %	diamond drilling (DDH S98-1) intercepted a 3 centimetre wide vein of sphalerite with traces of galena cut by fine calcite veins with minor pyrrhotite and trace chalcopyrite, at depth of 84.2 metres and hosted by calc-silicate rocks Assessment Report 25750
1998	N	Assay/analysis	Silver	7.1 g/t	
		Drill Core	Cadmium	0.268 %	
SAMPLE			Dolomite	20.0 %	Drill core samples yielded from 25.9 to 29.6 per cent calcium oxide and 15.1 to 20.0 per cent magnesium oxide Assessment Report 10247
1981	N	Assay/analysis			
		Drill Core			
SAMPLE			Dolomite	16.80 %	A sample of cored dolomite contained 27.70 per cent calcium oxide, 16.80 per cent magnesium oxide, 14.12 per cent silicon dioxide, trace of aluminium oxide, 0.52 per cent iron oxide and 39.94 per cent ignition loss Assessment Report 4923
1973	N	Assay/analysis			
		Drill Core			
SAMPLE			Dolomite	20.1800 %	From southwest end of band. Grade given for MgO. CANMET Report 811, page 212-Sample 85A.
1944	N	Assay/analysis			
		Grab
