MINFILE Number: 083D 038 **Name:** PUNCH BOWL **Status:** Prospect

Ore Zone/ Year/Report On	Tonnage/ Category	Commodity	Grade	Reference/ Comments
SAMPLE 2023 N	Assay/analysis Rock	Gold	4.70 g/t	Rock samples (148681, 151879 and 150878) of quartz vein material from an area of outcrop exposing a 15-metre long and up to 1-metre-wide quartz vein with brecciated pelitic fragments located near the British Columbia-Alberta border yielded 3.41, 1.97 and 4.70 grams per tonne gold, respectively Assessment Reports 39433, 40484 and 41530
SAMPLE 1989 N	Assay/analysis Rock	Gold	573.7 g/t	Three samples (38522 through 38524) taken from approximately the 2090 metre level of McGillivray Ridge from a well-mineralized bedding-parallel vein yielded values from 26.29 to 573.7 grams per tonne gold. Gold and silver analyzed by atomic absorption spectroscopy and fire assay. Assessment Report 19354.
VEIN 1987 N	Assay/analysis Rock	Gold	180.8 g/t	A rock sample (PB-27) of mineralized quartz vein material from the main showing area Assessment Report 16242
