Ore Zone/ Year/Report On	Tonnage/ Category	Commodity	Grade	Reference/ Comments	
1 2013	N Assay/analysis Drill Core	Iron	35 %	In 2013, four diamond drill holes were completed yielding an average of 35.0 per cent iron over 8.0 metres. Assessment Report 33963	
2 2013	N Assay/analysis Drill Core	Iron	30 %	In 2013, three diamond drill holes were completed yielding an average of 30 per cent iron over 21 metres. Assessment Report 33963	
SAMPLE 1997	N Assay/analysis Grab	Gold Iron	9.28 g/t 30 %	In 1997, a sample (RBL 2) assayed 9.28 grams per tonne gold and greater than 30 per cent iron over 2.0 metres Assessment Report 25513	
SAMPLE 1987	N Assay/analysis Grab	Gold Iron Cobalt	21.5 g/t 20 % 1.06 %	a sample (B-87-001) of magnetite with erythrite, from a 1 by 2.5 metre exposure Assessment Report 16321	
2 1951	N Assay/analysis Drill Core	Iron	45 %	In 1951, five drill holes were completed on Pod 2 showing magnetite intersections occurring from surface to a depth of 17.5 metres and ranging from 2 to 8 metres wide. Assays yielded an average 45 per cent iron over an average width of 5.7 metres Assessment Report 33963	
1 1951	N Assay/analysis Drill Core	Iron	45 %	In 1951, Pod 1 was drilled and channel sampled over a 100 metres in length with magnetite intersections occurring from surface to 17.5 metres in depth. These ranged from 2 to 10.5 metre wide intercepts in seven drill holes with an average width of 4.8 metres yielding 45 per cent iron Assessment Report 33963
