

MINFILE Number: 092HNE105	Name: BLUE JAY	Status: Prospect
----------------------------------	-----------------------	-------------------------

Ore Zone/ Year/Report On	Tonnage/ Category	Commodity	Grade	Reference/ Comments	
2002	N	Assay/analysis Drill Core	Gold Platinum Palladium	0.310 g/t 0.039 g/t 0.108 g/t	Re-sampling of core from drill hole 91-1 yielded values of up to 0.310 gram per tonne gold, 0.039 gram per tonne platinum and 0.108 gram per tonne palladium over 2.0 metre intervals. Assessment Report 27001
2002	N	Assay/analysis Grab	Gold	1.64 g/t	A grab sample (701-45) of malachite rich float from the southwest trench. Assessment Report 27001
1991	N	Assay/analysis Grab	Copper Gold	0.200 % 0.92 g/t	Grab samples from trenches located several hundred metres to the southwest and northwest of the main trenched area yielded 0.200 and 0.145 per cent copper with 0.92 and 0.02 gram per tonne gold, respectively. Assessment Report 22148
1991	N	Assay/analysis Drill Core	Gold Copper	0.2040 g/t 0.1900 %	A diamond-drill hole (91-1), located near the historic G79-15 drill hole, intercepted fine, patchy disseminated pyrite, chalcopyrite and minor bornite in sheared and propylitic-altered andesite yielding 0.19 per cent copper and 0.204 gram per tonne gold over 97.6 metres (14.0 to 111.6 metres down-hole), while another drill hole (91-2), located approximately 200 metres to the north and near the north bank of Tinmilsh Creek, yielded anomalous results including 0.241 per cent copper over 10.0 metres (282.0 to 292.0 metres down-hole), including 0.34 gram per tonne gold over 2.0 metres. Assessment Report 22148, page 22 (hole 91-1, 14.0 to 111.6 metres).
1984	N	Assay/analysis Rock	Silver Gold	1.8000 g/t 0.6000 g/t	Geochemical analyses, from a single rock sample. Assessment Report 13714.
1979	N	Assay/analysis Drill Core	Copper	0.16 %	A drill hole (G79-15) is reported to have yielded 0.16 per cent copper over 76 metres. Assessment Report 22148
1979	N	Assay/analysis Rock	Copper Gold	0.206 % 0.145 g/t	A rock sample (8134) from a trench, located approximately 20 metres south of the main native copper occurrence, yielded 0.063 per cent copper and 0.104 gram per tonne gold, while a sample from a trench to the southeast and near the bank of a creek, yielded 0.206 per cent copper and 0.145 gram per tonne gold over 15 metres. Assessment Report 22148

Ore Zone/ Year/Report On	Tonnage/ Category	Commodity	Grade	Reference/ Comments
TRENCH 1978 N	Assay/analysis Chip	Copper	0.2900 %	Samples taken from boulders along the bottom of a trench, located near the bank of the creek and southwest of the main copper zone, assayed 0.29 per cent copper over 45 metres, while other trenches to the northeast and on the main copper zone yielded up to 0.19 per cent copper over 1.8 metres. Assessment Report 7122, page 3.
DRILLHOLE 1960 N	Assay/analysis Drill Core	Copper	0.1 %	In the 1960s(?), two percussion holes drilled in the area of the trenches, are reported to have analysed at least 0.1 per cent copper over 15 metres or more. Assessment Report 9386, Map SF-81-2
