Ore Zone/ Year/Report On		Tonnage/ Category	Commodity	Grade	Reference/ Comments
TRENCHES			Zinc	0.586 %	Thirteen grab and chip samples from the historic trenches yielded an average of 0.586 per cent zinc, 0.401 per cent copper, 0.026 per cent lead and 0.075 gram per tonne gold, with values of up to 1.411 per cent zinc, 1.154 per cent copper, 0.199 per cent lead and 0.140 gram per tonne gold. Assessment Report 35585
2015	N	Assay/analysis Chip	Copper	0.401 %	
			Lead	0.026 %	
			Gold	0.075 g/t	
TRENCH			Copper	1 %	Grab samples (AT-MAY-009, -007 and -011) from a historic trench (no. 2). Assessment Report 32072
2010	N	Assay/analysis Grab	Zinc	1 %	
			Lead	0.354 %	
			Silver	8.2 g/t	
			Gold	0.450 g/t	
			Tungsten	0.050 %	
Molybdenum	0.028 %				
TRENCH			Copper	0.53 %	A sample (AT-MAY-010) from trench no. 6. Assessment Report 32072
2010	N	Assay/analysis Grab	Zinc	0.92 %	
			Tungsten	0.012 %	
SOUTHEAST			Gold	0.275 g/t	Two samples of epithermal quartz felsenmeer, located approximately 2.8 kilometres southeast of the occurrence, yielded 0.135 and 0.275 gram per tonne gold. Assessment Report 28827
2006	N	Assay/analysis Grab			
TRENCH			Silver	5.5000 g/t	Sample (69002) taken across a 1-metre zone of silicified and fractured andesite with pyrite, chalcopyrite, sphalerite and galena exposed in trench 2. Assessment Report 6697, page 10
1977	N	Assay/analysis Chip	Copper	0.1400 %	
			Lead	0.0900 %	
			Zinc	1.3500 %	
TRENCH			Silver	6.5 g/t	A sample (876K) across 0.3 metre of a shear zone exposed in trench 2. Assessment Report 6697
1977	N	Assay/analysis Chip	Copper	1.11 %	
			Lead	0.06 %	
			Zinc	2.14 %	
TRENCH			Copper	0.56 %	A sample (69001) over 1 metre from an altered zone exposed in trench 6. Assessment Report 6697
1977	N	Assay/analysis Chip	Zinc	0.80 %
