Ore Zone/ Year/Report On	Tonnage/ Category	Commodity	Grade	Reference/ Comments
HARRISON 2006 N	Assay/analysis Bulk Sample	Gold	0.49 g/t	<p>An 11.34-kilogram sample of gravel taken from the central part of the property, reduced to 64 grams of black sand using a series of standard screens. Results returned 86.83 grams of gold per metric tonne with 68.44 grams of gold per tonne being in the metallic fraction. Therefore, it would take 177.18 metric tones of material to produce one tonne of the black sand concentrate. Indicating the material ran 0.49 gram of gold per tonne.</p> <p>News Release Stockwatch 2006/01/03</p>
