

MINFILE Number:	093I 011	Name:	QUINTETTE (BABCOCK)	Status:	Producer
------------------------	----------	--------------	---------------------	----------------	----------

Ore Zone/ Year/Report On	Tonnage/ Category	Commodity	Grade	Reference/ Comments
BABCOCK 2024-B Y	5,756 Probable kt	Coal	100 %	Highwall mining run-of-mine metallurgical coal with 5% moisture. Chen, G. (2025-02-27) Prefeasibility Study Technical Report for the Quintette Restart Project, British Columbia, Canada
BABCOCK 2024-B Y	2,447 Proven kt	Coal	100 %	Highwall mining run-of-mine metallurgical coal with 5% moisture. Chen, G. (2025-02-27) Prefeasibility Study Technical Report for the Quintette Restart Project, British Columbia, Canada
BABCOCK 2024-A Y	6,638 Probable kt	Coal	100 %	Open pit reserves of run-of-mine metallurgical coal with 5% moisture. Chen, G. (2025-02-27) Prefeasibility Study Technical Report for the Quintette Restart Project, British Columbia, Canada
BABCOCK 2024-A Y	56,594 Proven kt	Coal	100 %	Open pit reserves of run-of-mine metallurgical coal with 5% moisture. Chen, G. (2025-02-27) Prefeasibility Study Technical Report for the Quintette Restart Project, British Columbia, Canada
BABCOCK 2024 Y	84,032 Indicated kt	Coal	100 %	In-place metallurgical (hard coking and low volatile PCI) coal. Resources are inclusive of reserves. Chen, G. (2025-02-27) Prefeasibility Study Technical Report for the Quintette Restart Project, British Columbia, Canada
BABCOCK 2024 Y	76,278 Inferred kt	Coal	100 %	In-place metallurgical (hard coking and low volatile PCI) coal. Chen, G. (2025-02-27) Prefeasibility Study Technical Report for the Quintette Restart Project, British Columbia, Canada
BABCOCK 2024 Y	79,946 Measured kt	Coal	100 %	In-place metallurgical (hard coking and low volatile PCI) coal. Resources are inclusive of reserves. Chen, G. (2025-02-27) Prefeasibility Study Technical Report for the Quintette Restart Project, British Columbia, Canada
