Ore Zone/ Year/Report On		Tonnage/ Category	Commodity	Grade	Reference/ Comments
2017	N	Assay/analysis Drill Core	Copper	0.182 %	Over 3 metres of hematized, epidote-pyrite-chlorite altered intermediate porphyry dike with chlorite-magnetite-pyrite+/-chalcopyrite stringers in hole JY17001. Assessment Report 37516
			Molybdenum	0.005 %	
			Silver	1.9 g/t	
2017	N	Assay/analysis Drill Core	Gold	0.14 g/t	Over 27.30 metres of quartz-pyrite altered feldspar porphyritic andesite flows and interbedded tuffs in hole JY17002. Assessment Report 37516
			Silver	1.9 g/t	
			Zinc	0.051 %	
2017	N	Assay/analysis Drill Core	Zinc	1.579 %	Over 5.6 metres of chlorite-epidote-magnetite altered intermediate porphyry dikes hosting stringers and blebs of sphalerite and pyrite in hole JY17003, from a zone that assayed 0.557 per cent zinc over 88.32 metres. Assessment Report 37516
			Gold	0.167 g/t	
2003	N	Assay/analysis Chip	Gold	0.93 g/t	Over 0.5 metre. Assessment Report 27492
2003	N	Assay/analysis Grab	Gold	1.04 g/t	Thirteen rock grab samples from the main Northwest Breccia zone yielded values up to 1.04 grams per tonne gold and averaged 0.44 gram per tonne gold. Assessment Report 27492
2003	N	Assay/analysis Rock	Gold	0.94 g/t	Rock sample (133812), taken approximately 500 metres to the southwest from an area of argillic to advanced argillic alteration. Assessment Report 27492
1998	N	Assay/analysis Rock	Gold	1.035 g/t	12 rock samples from outcrop and sub-crop yielded up to 1.035 grams per tonne gold, with 7 of the samples yielding over 0.136 gram per tonne gold. Assessment Report 25908
1995	N	Assay/analysis Grab	Gold	0.700 g/t	Best of four talus grab samples (173180, 174957, 174964 and 174965) from the area. Assessment Report 24641
1988	N	Assay/analysis Rock	Gold	0.10 g/t	Rock sample no. 5. Assessment Report 18161
			Silver	4.3 g/t
