

MINFILE Inventory Detail Report
BC Geological Survey
Ministry of Energy, Mines and Petroleum Resources

MINFILE Number:		104H 012	Name:	COYOTE	Status:	Prospect	
Ore Zone/ Year/Report On	Tonnage/ Category	Commodity	Grade	Reference/ Comments			
DRILLHOLE		Gold	0.99 g/t	This intersection occurred at 142 metres downhole in drillhole DD14RK005 and was the best intercept in weakly hydrothermally altered crystal tuff with abundant pyrite.			
2014	N	Assay/analysis Drill Core		News Release - Firesteel Resources Inc., November 14, 2014.			
DRILLHOLE		Gold	0.11 g/t	This 109.1 metre intersection occurred in intensely chlorite-altered volcanic rocks intruded by weakly mineralized monzonite dikes in the lower part of the hole (below 383 metres) with disseminated chalcopyrite-pyrite mineralized zones.			
2014	N	Assay/analysis Drill Core	Copper	0.05 %	News Release - Firesteel Resources Inc., November 14, 2014.
